**Crowdfunding Equitable Development: Cutting Deals for Good**  
*Tuesday, April 19, 2:30 – 3:30pm PT | Open to All Attendees | Concurrent Session*

New funding models—including crowdfunding platforms and emerging neighborhood wealth-building investment vehicles—are creating innovative ways of funding equitable and sustainable development. Enhancing community wealth, increasing economic mobility, and diversifying capital are some of the goals of these new forms of collective ownership. This session will explore the landscape for crowdfunding and shared-ownership and provide insights on the limitations and benefits for investors, developers, and communities.

**Future-Proofing Asset Value: The Pathway to Net Zero**  
*Tuesday, April 19, 4:00 – 5:00pm PT | Open to All Attendees | Concurrent Session*

To future-proof the value of assets across their portfolios, owners and investors are considering the economic, financial, and transition risks associated with ESG factors. Through activities such as energy efficiency, renewable
energy, electrification, and tenant engagement, firms are reducing carbon and building value. Real estate leaders who have incorporated decarbonization into their business model will discuss ways they are using a pathway to net zero to drive value across their portfolios today and in the long term.

**ULI Randall Lewis Center for Sustainability in Real Estate Reception**

*Tuesday, April 19, 5:00 – 6:00pm PT | Open to All Attendees | Special Programming*

In honor of real estate executive and ULI member Randall Lewis and his historic gift to embed long-term sustainability work at ULI, the former Center for Sustainability and Economic Performance (CSEP) has been renamed the ULI Randall Lewis Center for Sustainability in Real Estate. Join us in the Program Showcase Area 2 for refreshments as we connect and re-connect with one another and reflect on progress made and future plans to help advance and effect change on sustainability, health, equity, and resilience in buildings and communities around the world.

**ULI Coastal Forum**

*Wednesday, April 20, 8:00am – 12:00pm PT | Sign Up via the Forums page through Spring Meeting Registration | Special Programming*

ULI’s Coastal Forum will tackle the complex challenges of financing and investing in physical infrastructure for resilience in coastal communities. Join fellow stakeholders for a panel discussion with experts representing the scientific, public agency, private investment, and development facets of real estate and resilience. Following the panel, embark on a boat tour with fellow attendees to continue the conversation and learn more about local coastal resilience initiatives while enjoying the scenery of San Diego Bay. [Click here](#) to learn more about ULI’s Coastal Forum.

**ULI Centers & Initiatives Open House**

*Wednesday, April 20, 11:30am – 12:30pm PT | Open to All Attendees | Special Programming*

Join the ULI Centers & Initiatives (C&I) Open House in the Program Showcase Area to learn about ULI’s ongoing work and offerings focused on housing, infrastructure, real estate economics, sustainability, resiliency, building performance, and health & social equity while enjoying light refreshments. You will also have the opportunity to connect with C&I staff, provide input on programs, learn about upcoming research, and find ways to get involved.

**Advancing Climate Resilience and Equity through Community Development and Infrastructure**

*Wednesday, April 20, 4:00 – 5:00pm PT | Open to All Attendees | Concurrent Session*

This session will highlight how federal sources of community development financing can be used to address sustainability and resilience concerns through infrastructure investments. The moderator will provide context of the climate change and equity issues faced by local governments and present hypothetical situations, where panelists will illustrate how their agencies’ respective financing could work.

**A Renewable Energy Strategy for Real Estate**

*Thursday, April 21, 10:30 – 11:00am PT | Open to All Attendees | Micro-Session in the Member Engagement Area*

The path to decarbonization in real estate requires the integration of a renewable energy strategy. There is a strong business case for renewable energy, including lowering energy costs, strengthening the utility grid, improving resilience, meeting net zero goals, and increasing tenant demand. However, there are challenges to assessing opportunities, deal structures, and financing mechanisms that limit market uptake. Join this session to learn how leading real estate firms are incorporating renewable energy into their portfolio strategy and enhancing portfolio value.

**New ULI Reports & Resources**

**Green Leasing as Part of a Sustainable Tenant Fit-Out: Tenant Energy Optimization Program and Green Lease Leaders Program**

*Urban Land Institute, U.S. Department of Energy, Institute for Market Transformation*

Building owners and tenants are often characterized by split incentives, hindering joint efforts towards energy efficient buildings. However, both parties play a vital role in embedding sustainability into the built environment and ultimately have common ground that can be leveraged to achieve shared goals. This guide previews ULI’s Tenant Energy Optimization Program (TEOP) and IMT and U.S. DOE’s Green Lease Leaders program, highlighting their actionable steps for landlord-tenant collaboration in advancing sustainability in leased spaces.

Developing Urban Resilience Project Profile: Oak Park, IL — District House Project

Developing Urban Resilience is an online library showcasing best practices in real estate development and resilient design. The most recent profile highlights a mid-rise condominium in Oak Park, IL featuring five units with lawned terraces and a lush wildflower meadow on its rooftop. Originating from a request for proposals (RFP) for Oak Park, District House pays homage to the rich history of Prairie School architecture while weaving in modern design elements that speak to the value of resilient and sustainable building design.

Holistic Approaches to Climate Change and Health: Exploring the Case for Optimizing Co-Benefits in Real Estate
March 30 | 1:00pm ET
Virtual

Enhancing health has long been a goal of green buildings, and growing evidence shows that greener buildings are better for health and cognitive function. As real estate professionals increasingly seek to achieve multiple ESG goals around climate change and health, they also have opportunities to create long-term value and advance project success. Join this conversation to learn how industry leaders have optimized the co-benefits of green and healthy building features, and the case for doing so.

ULI's Building Healthy Places Book Club:
Reclaiming Your Community by Majora Carter
Reading Period: May - June 2022
Virtual Book Club
In this profoundly personal book, author Majora Carter shares the impact of her brother’s murder, how turning a local dumping ground into an award-winning park opened her eyes to the hidden potential in her community, her struggles as a woman of color confronting the “male and pale” real estate and nonprofit establishments, and more. It is a powerful rethinking of poverty, economic development, and the meaning of success. Book Club participants receive a suggested reading schedule, weekly email thought prompts, and a link to two virtual meetups, including discussion groups and a talk with the author.

New Partner Reports & Resources

**Climate Change 2022: Impacts, Adaptation and Vulnerability**  
Intergovernmental Panel on Climate Change (IPCC)

The Working Group II contribution to the IPCC Sixth Assessment Report assesses the impacts of climate change, looking at ecosystems, biodiversity, and human communities at global and regional levels. It also reviews vulnerabilities and the capacities and limits of the natural world and human societies to adapt to climate change.

**Upcoming Partner Events**

**Shaping the Future of Coastal Flooding Tools for Long Term Decision-Making**  
**March 22 | 2:00pm ET**  
**NOAA Virtual Convening**

The purpose of this session is to hear from realtors, real estate developers and insurance providers, to better understand needs for coastal flood resilience planning for the seasonal, annual, decadal and longer time horizons. In addition, attendees will learn about several existing NOAA products for coastal hazards reduction and resilience planning. Your participation will help NOAA understand gaps and needs to improve our products and tools to build coastal resilience.

**Opportunities to Get Involved**

**Research**  
**Climate Risk Analysis Focus Group**  
ULI is hosting a series of focus groups to help improve the usability of climate risk analysis tools and is seeking owners, developers, investors, and technical experts who have used or would like to use climate risk analysis software as part of their decision making process. If you have any questions, please reach out to resilience@uli.org, and learn more about getting involved through Navigator.

**Strategies to Integrate ESG into Tenant Engagement**  
The Greenprint Center for Building Performance is working on a report highlighting methods used to promote sustainable practices and tenant engagement into their asset management approach. If you have examples to share, please email Ben.Forman@uli.org.

**Awards**  
**ULI Americas Awards for Excellence’s Sustainability-Related Categories**  
The ULI Americas Awards for Excellence have several sustainability-related categories: low-carbon, resilient, equitable, and urban open space developments. The late deadline to submit a project for consideration is on March 20, 11:59pm PT. Learn more about these categories and learn how to submit a project here.

**Looking Ahead**
2022 ULI Fall Meeting Call for Proposals
Do you have a session idea for the 2022 ULI Fall Meeting in Dallas, TX (October 24-27)? The Call for Proposals is now open and will close on April 1, 2022. Click here to submit your session idea(s).

Non-ULI/Other Opportunities
Call for Development Projects
A call for projects is open for a pilot effort funded by the American Institute of Architects Upjohn Research Initiative. The goal is to identify new approaches to the real estate development process by centering community goals. Its results will be compiled into a framework report. The effort is being spearheaded by Adele Houghton – a green building architect and Doctor of Public Health candidate at Harvard. The deadline for submitting an initial statement of interest is March 21. Learn more here, and reach out to ahoughton@hsph.harvard.edu for more information.

Did You Miss It?

2022 Resilience Summit
Session Recordings
The 2022 Resilience Summit sessions are now available for viewing on Knowledge Finder! ULI's annual Resilience Summit brings together a network of leaders in the field of real estate and resilience to share practicable solutions to protect communities and investments from future climate risks. This past year's summit features top government officials, NGO representatives, and executives from private design, construction, development, finance, and insurance companies.
