In order to incorporate the identity of the area into our concept and strategic partnership with Goldman Properties – with their good track record in the area – and local public entities will be fundamental to make sure that Cubikko is compatible with the Neighborhood Revitalization District regulations.

With a goal of making Cubikko a meeting place for the community, we will not only invite famous anchor tenants but also work closely with the local retailers. The neighborhood will be composed of innovative businesses including art galleries, retail stores, antique shops, bars, artisanal eateries with one of the largest open-air street-art installations in the world.

A partnership with local, state, and federal housing authorities will enable us to support the Affordable Housing Plan of the City of Miami by allocating a substantial share of our proposed development to affordable housing that complies with applicable federal and state laws.
