THE OVERLINE

A green roof/water retention pond and water treatment is located at the eastern border of the site. This pond is a pedestrian-friendly corridor connecting the LIFELINE to the Design District through Miami Beach’s Biscayne Boulevard. This area connects the Northeast District to the larger cultural programs over the corridor. A green roof/water retention pond and water treatment is also located near many of the housing areas of the LIFELINE and is a useful environment.

THE STAGE

A three-acre pedestrian retention pond and water treatment is positioned at the eastern end of the LIFELINE. The OASIS provides excess water storage during flood events. The pond is designed to hold water in excess of what is needed for treatment and release into the local aquifer. This pond can be viewed from the Tri-Rail platform and helps mitigate the flood impacts on the local environment.

THE STAGE & THE STATION

The green roof/water retention pond and water treatment is located at the eastern border of the site. This pond is a pedestrian-friendly corridor connecting the LIFELINE to the Design District through Miami Beach’s Biscayne Boulevard. This area connects the Northeast District to the larger cultural programs over the corridor. A green roof/water retention pond and water treatment is also located near many of the housing areas of the LIFELINE and is a useful environment.

THE SPINE

The OASIS is a pedestrian-friendly corridor connecting the LIFELINE and the Design District through Miami Beach’s Biscayne Boulevard. This area connects the Northeast District to the larger cultural programs over the corridor. A green roof/water retention pond and water treatment is also located near many of the housing areas of the LIFELINE and is a useful environment.

ME - 15TH AVENUE (THE MOORINGS)

This is a three-acre pedestrian-friendly corridor connecting the LIFELINE to the Design District through Miami Beach’s Biscayne Boulevard. This area connects the Northeast District to the larger cultural programs over the corridor. A green roof/water retention pond and water treatment is also located near many of the housing areas of the LIFELINE and is a useful environment.

THE CAT Whip

A three-acre pedestrian retention pond and water treatment is located at the eastern border of the site. This pond is a pedestrian-friendly corridor connecting the LIFELINE to the Design District through Miami Beach’s Biscayne Boulevard. This area connects the Northeast District to the larger cultural programs over the corridor.
